

Currently working as an AI Researcher examining how AI will disrupt the food industry. I received a Distinction in my Imperial Computing MSc, where I focussed my research on AI-driven fraud. I summarised my research in a Financial Times op-ed [here](#). Alongside my Masters I coauthored the widely-read State of AI Report 2025.

Experience

November 2025 - present

[Bramble Intelligence](#), London UK

AI Researcher

- Conduct original research into how AI is reshaping global food systems, spanning production, processing, logistics, consumption, and sustainability. Prepare written research outputs (internal papers, client insights, and publications)
- Collaborate with Bramble teams to model or prototype AI applications relevant to clients or portfolio companies
- Contribute to defining Bramble's long-term AI strategy and capability roadmap

July 2025 - October 2025

Co-author of State of AI Report

[State of AI 2025](#)

- Selected to co-author widely read annual AI report, reaching hundreds of thousands of researchers, company leaders, and policymakers; peer reviewed by contributors from OpenAI and Tesla
- Report was shared and recommended by leading voices in AI: Eric Schmidt (former CEO of Google), Jan Beger (Head of AI Advocacy at GE Healthcare), and Marius Hobbhahn (CEO at Apollo Research)
- Previous co-authors include Ian Hogarth (Plural VC, Chair of UK's AI Foundation Model Taskforce)
- Synthesising cutting-edge ML research, industrial AI deployment, and societal implications; work featured in The Economist, Financial Times, MIT Technology Review, CNBC, and Forbes

January 2023 - September 2024

[V7 Labs](#), London UK

Series A data labelling & Generative AI platform helping computer vision teams build reliable models

Senior Customer Success Manager | March 2024 - September 2024

- Only team member to be promoted (despite workforce reduction) based on performance: 140% Net Revenue Retention, ~1% customer churn in first year (best in company)
- Winner of V7 Cup for an AI-enabled email tool: spearheaded project, recruited team, pitched idea

Customer Success Manager | January 2023 - March 2024

- Managed \$1M book of business across ~40 customers; key contact for AI teams working across many computer vision use cases from strawberry-picking robots to medical imaging
- Highly autonomous, demanding role comprising daily communication with AI engineers and a deep understanding of a broad cross-section of computer vision verticals

2021 - 2023

[Supercritical Tech](#), London UK

Seed B2B climate tech enabling companies to quantify & remove carbon emissions

Customer Success Manager | January 2022 - January 2023

- Built relationships with C-Suite at tech scale-ups and unicorns to help define product strategy based on analysis of customer needs.
- 100% NPS for final 2 months, managed >75% customer base

Product Associate | July - December 2021

- 3rd employee, working closely with founders to develop early product, sales cycle and customer base.
- Highly proactive role; described by founder as "the perfect early hire". Promoted in 6 months

Education

2024-Sept 2025 **Computing MSc**

Imperial College, London

- First-class grade, with my thesis *AI-Driven Deception: Using Large Language Models For Scalable Fraud* receiving a high first (81). Based on my thesis research, I wrote an op-ed for the Financial Times on AI-enabled fraud
- For my AI Ventures module I recruited a team to build a tool leveraging AI to streamline the process of buying and selling homes. We won the Imperial Hackathon, the Imperial Pitch Competition (within our cohort), and secured an interview with YCombinator

2016-2020 **French & Italian Literature BA**

Christ Church, Oxford University

- First-class grades in all university exams, received Academic and Musical scholarships
- Played lacrosse for university, elected Musical Director of semi-professional vocal group, elected Freshers' Rep

2009-2016 **St Paul's Girls' School**: Head Girl Team; 3A*s A level; ABRSM Diploma in Violin Performance
